

Production Index & Handoff

Everything in this package, how it's organised, how to re-render, and the flags to check before launch

What's in the package

One folder per module (each with Scripts/ and Resources/), plus Bonuses, Replays, the completed course sheet, and this index.

FOLDER	SCRIPTS	RESOURCES
00_Course_Home	Welcome video (5 min)	Welcome Guide; Pre-Course Survey form sheet + welcome-audio script
01_Module_1	M1T0 intro + T1–T5	Foundations Overview; Self-Assessment (+quiz form sheet); Triggers Worksheet; Affirmations audio script/cards/vision board; Partner Agreement; Reflection Journal
02_Module_2	M2T0 + T1–T8	Nutrition Starter Guide; Grocery List.xlsx; Sugar Swap Recipes; Drink Recipes; Gut Health Quiz; Meal Template.xlsx; Elimination Guide; Supplement Checklist; Challenge Tracker
03_Module_3	M3T0 + T1–T6 (T1 = 15-min guided yoga)	Movement Basics; Yoga Pose Guide; Walking Tracker; Strength Routine; Cardio Log.xlsx; Recovery Journal; Weekly Planner.xlsx
04_Module_4	M4T0 + T1–T7 (T1 includes the 5-min guided body scan)	Stress Toolkit; Meditation Audio Script & Log; Breath Guide; Journal Prompts; Gratitude Cards; Emotion Wheel; Sleep Hygiene; Challenge Log
05_Module_5	M5T0 + T1–T7	Detox Guide; Toxin Checklist; Clean Recipes; Product Swap List.xlsx; Safe Product Guide; Detox Routine; Filter Recommendations; Detox Tracker

FOLDER	SCRIPTS	RESOURCES
06_Module_6	M6T0 + T1–T6	Connection Workbook (Visioning, Intimacy, Legacy, Challenge sections); Listening Exercises; Conflict Guide
07_Module_7	M7T0 + T1–T6	Integration Roadmap; Plan Template; Habit Log; Progress Tracker.xlsx; Milestone Guide; Conception Timeline; Capstone Reflection
08_Bonuses	Bonus 1 (15 min); THE FIX Sessions 1–3 (20 min each); session-summaries audio script	Dozen Habits Workbook; Cravings Fix Workbook
09_Replays	Replay 1 (35 min) and Replay 2 (40 min) live-call facilitation scripts	Cravings FAQ; Connection Q&A Notes
root	Baby_Steps_Course_Sheet_COMPLETE.xlsx (all rows, incl. reconstructed M6T2–M7T6, bonuses, replays)	this index
_production	build.py + every script/resource source (.md)	re-render any file after edits

Script formats

Every script ships three ways: **PDF** (teleprompter layout: large type, cues in small italic boxes, timecoded sections, action callout, word-count/runtime line), **_teleprompter.txt** (spoken words only, section headers in caps; paste into any prompter app), and **.docx** (editable, with cues). Cues: [VISUAL: ...], [DEMO: ...], [DIRECTION: ...]; pauses: [PAUSE — ...].

Runtime note

Scripts are written for Cynthia's warm coaching delivery. The header of each PDF shows the spoken word count and two estimates (150 wpm and 135 wpm). Most trainings land on target at ~130–140 wpm with the demos, pauses and B-roll; the guided practices (M3T1 yoga, M4T1 body scan) are paced at ~90 wpm with real silence. THE FIX sessions and the replays include live Q&A / discussion that fills the stated runtimes. If Cynthia reads fast, lengthen with the expand-pattern in _production (insert-after paragraphs).

Flags to check before launch

- **Cynthia's own book titles:** M7T6 and THE FIX Session 1 have a [DIRECTION] cue to name them on camera; the Cravings Fix Workbook has a placeholder line.

- **The Craving Cure chapter reference:** the brief said "Chapter 3"; scripts say "the craving-type questionnaire near the start of the book" — confirm against the edition used.
- **Links to verify:** forms.gle/pre-course-survey, forms.gle/wellness-quiz, facebook.com/groups/babystepscohort, facebook.com/groups/babysteps-alumni, support@cradleyourcravings.com; M4T4 and M5T3 sheet rows listed YouTube placeholders (youtube.com/couple-gratitude, youtube.com/home-detox) — scripts are written as uploads.
- **Audio to record:** welcome-audio.mp3 (Course Home), Affirmations Audio.mp3 (M1T3), Meditation Audio.mp3 (M4T1, same text as the guided section), session summaries.mp3 (THE FIX), plus the M1T1 training audio embed (audio of the video).
- **Replays:** facilitation scripts are run-of-show for the live calls; the verbatim transcript for Replay 2 is generated from the recording after editing and appended to Connection Q&A Notes; update Cravings FAQ after each Replay 1 call. Anonymize all participant stories; no outcome numbers.
- **XP:** per-training values follow the source sheet's pattern; the brief's "~1,430 total" is lower than the sheet's own per-training sum. See XP Summary tab; adjust in Xperienify if needed.
- **File formats:** spreadsheets are .xlsx (the sheet said .xls). Open in Excel or Google Sheets.
- **Google Forms:** build sheets for the pre-course survey and the Wellness Quiz are in 00_Course_Home and M1T1 resources.

Content standards applied throughout

- No claims that Cynthia cured/healed many people; no "helped hundreds"; no quantified client outcomes. Client stories are anonymized and qualitative. Cynthia's own story (nearly 100 lb, 25+ years, EdD, food addiction professional, author on cravings) is used instead.
- Every scientific claim names a source; brief citations that didn't exist or were wrong were replaced (e.g. Harvard stat → 66%, Chavarro 2007; "shared habits double success" → Jackson et al., JAMA IM; "Yoga Journal study" → peer-reviewed yoga/stress research; "JSCR strength–fertility link" → PCOS resistance-training trial; "reduces anxiety 40%" → Goyal et al., JAMA IM; "IVF +20%" → Frederiksen 2015 / Domar 2011; "skin absorbs 60%" → Janjua 2007; "Atomic Habits by Duhigg" → James Clear / Duhigg's Power of Habit).
- Safety lines to keep: consult your doctor for supplements, elimination diets, exercise and detox practices; celiac testing before going gluten-free; no licorice-root tea; vitamin A caution; no saunas/hot tubs for men trying to conceive or anyone possibly pregnant; never mix bleach with vinegar/ammonia; IgG "sensitivity panels" unvalidated; when-to-see-help guidance in Module 4 and the replays.

Re-rendering after edits

In `_production`: `pip install weasyprint markdown --break-system-packages`, then `python3 build.py script SRC.md OUT_DIR` for scripts or `python3 build.py resource SRC.md OUT_DIR` for PDFs. Spreadsheets are generated by the `m2_xlsx.py`, `m3_res_b.py`, `m5_res_b.py`, `m7_res.py` and `course_sheet.py` scripts. Fonts: Georgia with Liberation Serif fallback; house style cream/rose/sage/gold.
