

Detox Routine

Gentle protocols with honest evidence notes, safety rules, a weekly rhythm, and an effects journal ·

Module 5, Training 5

The facts first

Your **liver and kidneys** detox, continuously. What supports them: water, fiber (30 g/day binds bile and carries it out), sleep, fewer incoming chemicals, minimal alcohol, cruciferous vegetables. Nothing you brush, soak or sweat replaces that. What gentle protocols add: **stress reduction, a ritual of care, and (for sweating) a small amount of extra elimination.**

PROTOCOL	WHAT THE EVIDENCE SUPPORTS	WHAT IT DOESN'T	HOW
Dry brushing	exfoliation; a 5-minute mindfulness ritual	"lymph drainage" or toxin removal (no research)	natural-bristle brush, dry skin, before shower; long light strokes toward the heart; skip face and broken skin; 3–5 min
Epsom bath	warmth before bed shortens time to fall asleep (Haghighyegh, <i>Sleep Medicine Reviews</i>); 20 quiet minutes reduce stress	meaningful magnesium absorption through skin (small, mixed studies)	1–2 cups magnesium sulfate, water 37–38 °C / 98–100 °F, 20 min, water within reach, get out slowly
Sweating (sauna, movement)	some toxic elements excreted in sweat (Genuis, <i>Arch Environ Contam Toxicol</i>); regular sauna ↔ lower cardiovascular mortality (Laukkanen, <i>JAMA Internal Medicine</i>)	men trying to conceive: sauna reduced sperm count and motility, reversibly (Garolla, <i>Human Reproduction</i>)	men: no sauna/hot tub for the 90 days; women not yet pregnant: moderate sauna if well hydrated; anyone who could be pregnant: avoid (ACOG)
Sleep	the brain's own clearance runs in deep sleep; the liver works overnight	—	the Module 4 routine, every night
Fiber	binds bile-bound chemicals and excess hormones for excretion	—	beans, oats, vegetables, fruit; 25–30 g/day

Dry-brushing steps (from the demo)

1. Feet → up the calves → up the thighs → over the hips, long light strokes toward the heart.

2. Hands → up the arms toward the shoulders.
3. Light circles on the belly; very light on the chest; skip the face.
4. Skin faintly pink, never red or scratched. 3–5 minutes.
5. Shower, then fragrance-free moisturiser.

Weekly rhythm

MON	TUE	WED	THU	FRI	SAT	SUN
brush a.m.	bath p.m.	brush a.m.	bath p.m.	brush a.m.	bath p.m.	rest

Sweat through the Module 3 walks and cardio. Sleep every night. 2–3× a week of each ritual is plenty.

Safety

- Hydrate before and after (Module 2 target).
- Warm, not hot. Ease in: 5 min brushing, 15 min bath, then see.
- **No saunas or hot tubs for men trying to conceive, or for anyone who might be pregnant.** Laptops off laps.
- Stop if dizzy, faint or unwell. Get out of the bath slowly.
- Heart condition, low blood pressure, skin condition, pregnancy, medication → ask your doctor first.
- Skip anything sold as a "cleanse" involving laxatives, extreme fasting or unregulated supplements.

Try one protocol (30 XP)

☐ Dry brushing ☐ Epsom bath ☐ Sleep routine ☐ Fiber to 30 g ☐ Sweating through movement —

Started: _____

Effects journal (40 XP)

Not "did I detox" (you can't measure it at home) but "did I feel cared for" (you can).

DAY	PROTOCOL	SLEEP QUALITY 1–10	MOOD 1–10	SKIN	STRESS 1–10	NOTES
