

Welcome Guide

How Baby Steps works, what to expect, and how to get the most from the next 12 weeks

A note from Cynthia

Welcome. Whether you arrived here full of hope, worn down by waiting, or somewhere in between, you are in the right place. This course is built on three promises: **science-backed** (every claim is tied to a named source), **heart-led** (grace over guilt, always), and **baby steps** (small, repeatable actions rather than grand overhauls). You do not have to be perfect here. You have to keep showing up.

"Your body is forgiving. It's been waiting for you to show up, not to be perfect."

Why the next 90 days matter

- A sperm cell takes roughly **74 days** to develop plus about two weeks to mature (Heller & Clermont, *Science*; summarized by the NIH).
- The follicle that releases an egg spends its final months of growth in a similar window (Gougeon, *Human Reproduction*).
- The 2018 *Lancet* preconception series describes the months before conception as a critical window in which both partners' nutrition and lifestyle shape the pregnancy and the child.
- Epigenetics research (Dutch Hunger Winter, *PNAS* 2008; Överkalix cohort, *European Journal of Human Genetics* 2006) shows that pre-conception conditions can leave marks that reach the next generation.

That is why the course is designed as a **12-week journey**: one module roughly every week, with time built in to practise rather than just watch.

Your 12-week map

WEEK	OPENS	MODULE	WHAT YOU'LL BUILD
1	Day 0	M1 · Foundations of Family Wellness	Baseline, craving awareness, mindset, partner agreement
2–3	Day 7	M2 · Nutrition for Optimal Fertility	Fertility foods, sugar swaps, hydration, gut health, meal planning, sensitivities, supplements, 7-day challenge

WEEK	OPENS	MODULE	WHAT YOU'LL BUILD
4	Day 14	M3 • Exercise and Movement	Gentle yoga, couples' walks, strength, cardio, rest, weekly plan
5–6	Day 21	M4 • Stress Management and Emotional Wellness	Meditation, breathwork, journaling, gratitude, fertility emotions, sleep, 7-day challenge
7–8	Day 28	M5 • Toxin Elimination and Detox	Toxin audit, clean eating, home clean-up, personal care, gentle protocols, water & air, 7-day challenge
9–10	Day 35	M6 • Family Connection and Communication	Listening, conflict repair, shared vision, intimacy, legacy, 7-day challenge
11–12	Day 42	M7 • Integration and Long-Term Wellness	Your personal pre-conception plan, habits, monitoring, milestones, next steps, capstone

Bonuses ("All Bonuses" in the navigation bar): *A Dozen Habits for a Healthy Life* and *THE FIX for Cravings* (three sessions). Replays ("All Replays"): two group-coaching recordings.

How each training works

1. **Watch** the video (7–15 minutes). Every script is delivered by Cynthia, first-person, no jargon without an explanation.
2. **Download** the resource underneath it: a worksheet, recipe set, tracker, guide, or audio.
3. **Do** the actions (usually two or three). Each one earns XP when you mark it complete.
4. **Share** in the forum. This is optional for most trainings but it is where the community lives, and it is almost always worth XP.

XP: what it is and why it matters

XP (experience points) are awarded for consumption (watching, reading), implementation (doing the practice) and sharing (posting in the forum). They are a visible record of promises you kept to yourself.

WHERE XP COMES FROM	APPROX. XP
Course Home pre-actions	60
Course goals (minimum / target / stretch)	50 / 100 / 150
Core trainings across 7 modules	~1,200
Module completion bonuses (7 × 10)	70
Bonuses and replays	~100

Course goals

- *Minimum goal (50 XP)*: identify your personal health barriers (such as cravings) and set your first wellness habits.
- *Target goal (100 XP)*: reach a solid pre-conception baseline for you and your partner, including balanced nutrition and lower stress.
- *Stretch goal (150 XP)*: reduce toxins, build strong family bonds, and prepare a multi-generational legacy of health with sustained vitality.

Before you begin: three pre-actions (60 XP)

- ☐ **Introduce yourself** in the private Facebook group: who you are, where you're starting, and one hope for this journey (10 XP).
- ☐ **Whitelist** support@cradleyourcravings.com in your email contacts so lesson reminders and replies reach you (10 XP).
- ☐ **Complete the pre-course survey** — four questions: your BIG WHY, your current support, your heartfelt goals, and what you will do, be and change to reach them (40 XP). You will revisit these answers in Module 7.

What to have on hand

- A notebook or journal (paper or digital). Almost every training asks you to write a few lines.
- A water bottle you like. Hydration is a recurring theme.
- Thirty quiet minutes, two or three times a week.
- If you have a partner, an agreed 15-minute check-in slot each week (you'll set this up in Module 1, Training 4).

Community guidelines

- Grace over guilt: no shaming, of yourself or anyone else.
- Privacy: what is shared in the forum and the group stays there.
- Ask, don't diagnose: share what worked for you; leave medical advice to clinicians.
- Show up honestly: "This week was hard" is a valid post and often the most helpful one.

Support and safety

- Questions about the platform, access or payments: **support@cradleyourcravings.com**.

- This course is education, not medical care. Please involve your doctor, midwife or a registered dietitian before changing supplements, starting an elimination diet, beginning a new exercise programme or trying any detox practice, especially if you have a diagnosed condition, are undergoing fertility treatment, or are already pregnant.
- If you are struggling emotionally, Module 4 includes guidance on when and how to seek professional support. You do not have to wait until then.

Your first step

Complete your three pre-actions, claim your first 60 XP, then open Module 1, Training 1. Bring your journal. We start with where you are, not where you think you should be.

Educational content only, not medical advice. Always consult your doctor or a qualified health professional before changing supplements, diet, exercise or detox practices, especially while trying to conceive.
