Rest is active

Muscle repairs, hormones rebuild and stress clears during sleep. Sleep disruption is linked to menstrual irregularity (Kloss et al., *Sleep Medicine Reviews*); men sleeping 7–7.5 hours had the best semen quality (Chen et al., *Fertility and Sterility*, 2016); a 10-minute nap gave the best alertness gain without grogginess (Brooks & Lack, *Sleep*). Adults need 7+ hours (CDC, AASM). Consistency of bedtime matters as much as length.

Partner rest rituals (tick the ones you'll try)

- ☐ Lights out at the same time, even if one of us reads
- ☐ Ten-minute stretch together on the bedroom floor
- ☐ Phones charge in the kitchen, for both of us
- ☐ Sunday-afternoon nap, curtains drawn, no plans after
- ☐ Before-bed check-in: "How was your day? What are you grateful for?"

Solo: tell your support person your bedtime and let them ask about it.
