

Toxin Checklist

Room-by-room audit, the four categories, priority order, and your three to reduce · Module 5, Training 1

How to audit

Walk each room with this sheet and nothing else. **Count, don't judge, don't throw anything out yet.** Tick what you find. This is a looking week; Trainings 2–6 are the swapping weeks.

The four categories (and the "big three")

CATEGORY	EXAMPLES	WHY (EVIDENCE)
Plasticizers (BPA, phthalates)	heated plastic containers, can linings, thermal receipts, hot-car water bottles, plastic wrap on warm food, scented products	BPA ↔ poorer IVF ovarian response (Ehrlich, <i>Human Reproduction</i>); phthalates ↔ semen quality (Duty, <i>Epidemiology</i>) and IVF outcomes (Hauser, <i>EHP</i>)
Pesticides	conventional strawberries, spinach, kale, apples, grapes; lawn/garden/indoor pest sprays; pet flea treatments	high-residue produce ↔ lower pregnancy/live-birth probability in ART (Chiu, <i>JAMA Internal Medicine</i>)
Cleaning products & indoor air	sprays under the sink, air fresheners, plug-ins, scented candles, dryer sheets, dust	sprays ↔ lung-function decline (Svanes, <i>AJRCCM</i>); dust carries phthalates, flame retardants, phenols (Mitro, <i>ES&T</i>)
Personal care	"fragrance/parfum", "-paraben", long ingredient lists	parabens ↔ sperm DNA damage, ovarian reserve markers (Meeker; Smith, <i>EHP</i>)
The big three	tobacco/vaping/second-hand smoke · alcohol · heat for men (laptops, hot tubs, saunas)	ACOG committee opinion; Garolla (<i>Human Reproduction</i>)

Kitchen (audit first: food + heat)

- ☐ Plastic containers I heat food in: ____ (count)
- ☐ Plastic wrap used on warm food
- ☐ Scratched or old nonstick pans: ____
- ☐ Canned foods in the pantry: ____ (most linings contain BPA or a substitute)
- ☐ Spray cleaners under the sink: ____ · labelled "danger/warning": ____

- ☐ Scented candle / plug-in / air freshener in the kitchen
- ☐ Receipts kept in a drawer
- ☐ Plastic water bottles reused or left in the car
- ☐ Gas stove without an extractor vented outside

Bathroom (line up everything you use in a day)

- ☐ Products used daily: _____ (count)
- ☐ Contain "fragrance" or "parfum": _____
- ☐ Contain a "-paraben": _____
- ☐ Aerosol sprays (hair, deodorant, dry shampoo): _____
- ☐ Scented candle / air freshener / plug-in
- ☐ Antibacterial soap with triclosan
- ☐ Window or fan for ventilation? ☐ yes ☐ no

Laundry & cleaning cupboard

- ☐ Fragranced detergent · [] fabric softener · [] dryer sheets
- ☐ Bleach stored next to vinegar or ammonia products (separate them)
- ☐ Pesticide / insect sprays: _____

Bedroom

- ☐ Plug-in freshener or scented candle
- ☐ Dust under the bed / on electronics
- ☐ Electronics charging by the bed: _____
- ☐ Mattress older than ~10 years, or new and not aired
- ☐ Window opened daily? ☐ yes ☐ no

Garage, garden, entry

- ☐ Pesticides / herbicides / solvents / paint stored indoors
- ☐ Car idled in an attached garage
- ☐ Shoes come off at the door? ☐ yes ☐ no

Habits (the big three)

- ☐ Smoking or vaping in the household · [] second-hand smoke
- ☐ Alcohol more than minimal
- ☐ Men: sauna / hot tub / laptop on lap in the last month

Total ticks: _____ (a high number is normal; nearly every tick has a cheap swap)

Priority order

1. **Kitchen** (heat + food contact) → stop heating food in plastic this week
2. **Skin, all day** (lotion, deodorant, daily shampoo) → Training 4
3. **What you breathe** (sprays, fresheners, dust) → Training 3
4. **Water and air** (filters, purifier) → Training 6

Sort your ticks: *pile one* touches food or heat · *pile two* sits on skin or is breathed all day · *pile three* everything else. Clear pile one first.

My three to reduce (30 XP)

#	WHAT	WHICH PILE	THE SWAP	WHEN
