

Integration Roadmap

Your map for Module 7 · Integration and Long-Term Wellness · Baby steps become lifelong strides

The idea

The 90 days you've just lived have already changed the environment in which the cells that could become your child are built. Biology doesn't stop at day 90: the same habits carry into pregnancy (ACOG prepregnancy counselling) or carry you through the waiting. Habits become automatic after a median of 66 days (Lally et al., *European Journal of Social Psychology*); you're at about 63.

The fifteen keeper habits (tick the ones you already keep)

PILLAR	KEEPER HABITS (THREE EACH)
Nutrition (M2)	fertility plate at every meal · protein-first breakfast · morning glass of water (+ supplements agreed with your doctor)
Movement (M3)	three 20-minute walks · two strength sessions · one true rest day
Stress (M4)	five-minute meditation · sleep routine (phone in the kitchen, lights out on time) · nightly gratitude share
Toxins (M5)	glass not plastic for food · fragrance-free products · shoes off + windows open (+ filters changed on schedule, Dirty Dozen organic)
Connection (M6)	weekly check-in · daily "turning toward" a bid · the future letter kept where you can find it
Men, always	no sauna, no hot tub, laptop off the lap

The four-month timeline

MONTH	THEME	HABIT TARGET (OF 15, MOST WEEKS)	FOCUS
1	Build	9	all fifteen on the page; the easiest first
2	Deepen	12	add strength sessions, filter purchase, any elimination trial your doctor approved
3	Consolidate	15	the log shows where you actually are

MONTH	THEME	HABIT TARGET (OF 15, MOST WEEKS)	FOCUS
4+	Maintain, and try	15	plan becomes a Sunday glance; attention moves to timing (T5) or your doctor's advice

Module 7 at a glance

TRAINING	RUNTIME	RESOURCE	ACTIONS (XP)	TOTAL
T1 · Creating Your Pre-Conception Plan	12	Plan Template.pdf	Build plan 40 · Set milestones 30 · Share 20	90
T2 · Sustaining Habits Post-Course	10	Habit Log.pdf	Choose 3 habits 40 · Track 30	70
T3 · Monitoring Progress and Adjustments	11	Progress Tracker.xlsx	Monitor 1 week 50 · Adjust 30 · Share 20	100
T4 · Celebrating Milestones	9	Milestone Guide.pdf	Plan 1 milestone 40 · Celebrate 30	70
T5 · Preparing for Conception and Beyond	12	Conception Timeline.pdf	Outline prep 40 · Review survey & adjust 30 · Share vision 20	90
T6 · Course Capstone and Q&A	13	Capstone Reflection.pdf	Reflection 50 · Testimonial 30 · Join alumni 20	100
Module completion bonus				10

Medical timelines (never let the plan delay these)

Under 35: see a doctor or fertility specialist after 12 months of trying · 35 and over: 6 months · 40 and over, or any known condition (irregular/absent periods, PCOS, endometriosis, thyroid disease, two or more losses, pelvic infection history, known male factor): don't wait (ASRM, ACOG). The plan runs alongside, not instead.

Your "why" for this module

"I'm making this last because, for my future family, I want _____."

Educational content only, not medical advice. Always consult your doctor or a qualified health professional before changing supplements, diet, exercise or detox practices, especially while trying to conceive.
