

Yoga Pose Guide

Six poses, modifications for every body, the breathing pattern, and a feelings log · Module 3, Training 1

Before you begin

Check with your doctor if you have an injury or condition, or are already pregnant. Skip anything that hurts. You need a mat or folded blanket, a pillow, and a wall. Partners can practise side by side; nobody has to be good at it.

The breath used throughout: in through the nose for a count of 4, belly rising; out through the mouth for a count of 6, like fogging a mirror. Yoga's clearest fertility benefit is lowering the stress response (Pascoe & Bauer, *Journal of Psychiatric Research*; Darbandi et al., *Journal of Reproduction & Infertility*).

The practice (≈10 minutes)

#	POSE	TIME	HOW	MODIFICATIONS
0	Seated breathing	1 min	Sit comfortably, one hand on belly, one on heart. Three rounds of 4-in / 6-out.	Sit on a pillow or a chair
1	Child's pose	2 min	From hands and knees: big toes together, knees wide, hips back toward heels, arms forward or alongside, forehead down. Breathe into the back ribs; hips heavier on each exhale.	Pillow between thighs and calves if hips don't reach heels; folded blanket under knees; keep knees closer if wide is uncomfortable
2	Cat & cow	1.5 min	Hands under shoulders, knees under hips. Inhale: belly drops, chest and tailbone lift (cow). Exhale: press floor away, round spine, tuck chin and tailbone (cat). Six slow rounds led by the breath.	Fists instead of flat palms for sore wrists; do it seated on a chair, hands on knees
3	Butterfly (Baddha Konasana)	2 min	Soles of feet together, knees open, hold ankles or feet, sit tall. Inhale to lengthen; exhale to hinge forward a little from the hips, back long. Stop where you feel the inner thighs.	Feet further from the body; pillow under each knee; sit on a folded blanket; partners back to back, breathing together

#	POSE	TIME	HOW	MODIFICATIONS
4	Legs up the wall (Viparita Karani)	3 min	Sit sideways to a wall, swing legs up as you lie back, hips close to the wall, arms open or hands on belly/heart. Eyes closed. Legs heavy. Long exhales into the lower back.	Hips a few inches from the wall for tight hamstrings; pillow under the hips; knees slightly bent
5	Supine twist & rest	1.5 min	On your back, hug knees, let them fall right, look left; breathe; switch. Then lie flat and rest four breaths.	Pillow under the knees when they fall; skip the twist if it strains the low back

After the practice

Hand on heart. Notice one thing in your body that feels softer than ten minutes ago. Evenings are ideal: this practice is a bridge into sleep (Training 5).

Short version (5 min): child's pose 2 min + legs up the wall 3 min.

Feelings log (30 XP: journal after your session)

DATE	TIME OF DAY	POSES DONE	BEFORE (1 WORD)	AFTER (1 WORD)	BODY: WHERE DID TENSION RELEASE?	MIND: BUSIER OR QUIETER?
------	-------------	------------	-----------------	----------------	----------------------------------	--------------------------

What surprised me:

What I'd like to try next time (longer hold, partner, morning):

Share a photo (20 XP)

Post a photo of your practice space (a corner, a mat, a wall) in the forum. No poses required.
