

A Dozen Habits for a Healthy Life — Workbook

Twelve micro-habits, one per module tie-in, with recipe cards, a pick-three page and a 7-day tracker

· Bonus 1

The science in two lines

Anchor + tiny behaviour + celebration is what makes a habit stick, not its size (Fogg, *Tiny Habits*). Habits become automatic after a median of 66 days; a missed day makes no difference; small, specific actions tied to a consistent cue become automatic (Lally et al., *European Journal of Social Psychology*; Gardner, Lally & Wardle, *British Journal of General Practice*).

The twelve

#	HABIT	RECIPE: AFTER I... I WILL...	MODULE	WHY (ONE LINE)
1	Daily gratitude	get into bed → say one specific thing I'm grateful for, hand on heart	M4	gratitude journaling improved mood and sleep (Emmons & McCullough)
2	Morning water	turn off my alarm → drink a full glass before coffee	M2	mild dehydration worsens mood and focus (Armstrong)
3	Protein first	start breakfast → protein on the plate before anything else	M2	steadies blood sugar; quiets the 3 p.m. craving (Lennerz)
4	Greens twice	make lunch / dinner → a handful of greens goes on	M2	folate, magnesium, fiber (ACOG folate; Gaskins)
5	Glass, not plastic	put leftovers away → glass, never heated in plastic	M5	BPA/phthalates + heat is the most direct route in (Ehrlich; Hauser)
6	Fragrance-free turnover	finish a bottle of anything on my skin → replace with fragrance-free	M5	parabens/phthalates in fragrance (Meeker; Smith)
7	The walk	finish dinner → 20 minutes outside (10 if it's all I have)	M3	moderate movement, better odds at every body size (Wise); fewer cravings (Oh & Taylor)
8	Phone sleeps in the kitchen	plug it in at 9 → don't touch it until morning	M3/M4	screens suppress melatonin (Chang)
9	Five minutes of stillness	pour my coffee → sit with the body-scan audio or my breath	M4	mindfulness improved anxiety across 47 trials (Goyal)

#	HABIT	RECIPE: AFTER I... I WILL...	MODULE	WHY (ONE LINE)
10	The daily bid	my partner says something small → "show me" / "tell me" (solo: one text to my circle)	M6	turning toward bids predicted lasting relationships (Gottman & Driver)
11	Mindful first bite	sit down to eat → the first bite gets full attention	M1	interrupts autopilot; mindfulness reduces emotional eating (Katterman)
12	The Sunday glance	finish Sunday breakfast → open the plan: three dinners, the week's movement, the milestone	M2/M3/ M7	self-monitoring is the most effective change technique (Michie)

Stacks

Morning stack: alarm off → water → coffee + five minutes of stillness → protein-first breakfast. Four habits, one chain, before any messages. **Evening stack:** dinner → greens → mindful first bite → the walk → phone to the kitchen at 9 → gratitude at the pillow. **The pairing:** the walk (M3) + the listening loop (M6): first ten minutes, one speaks, the other reflects.

Pick three (one you're close to · one that scares you a little · one that connects you to your partner or circle)

MY HABIT AFTER I... I WILL... THEN I'LL CELEBRATE BY... TINY VERSION FOR A BAD DAY

1.

2.

3.

7-day tracker (10 XP: upload this page or a journal entry)

DAY	HABIT 1	HABIT 2	HABIT 3	ONE LINE: WHAT I NOTICED
1	☐	☐	☐	
2	☐	☐	☐	
3	☐	☐	☐	
4	☐	☐	☐	
5	☐	☐	☐	
6	☐	☐	☐	
7	☐	☐	☐	

When these three are automatic (a few weeks), add the next three. A dozen habits happen three at a time, over a season.

Share your top habit (10 XP)

Post the one you kept and its anchor. Someone in the forum is looking for exactly that one.

"Habits aren't chores; they're loving acts for your family's future."
